Ivison, Blakeman & Co.
753 & 755 BROADWAY, NEW YORK

November 14, 1889.

Prof Sereno Watson,
Cambridge, Mass.,

Dear Sir,—

We send you herewith under another envelope proofs of the relief plates engravings which we have had made from the copper plates which you sent us some time since. These are the plates which you requested us not to use until further word from you, but as they were well under way toward completion we did not countermand the order for photo-engraving. The proofs show what can be done in the way of relief printing. We think that with fine high surface paper this result can always be secured.

We have now in hand of the engraver the proofs of the lithographed plates used in the present Edition of the Manual and hope to secure equally good results from them.

We note that in the text to each the plates you do not go above No 21 — at least we have received only proofs to that point. As soon as you can decide on further plates we should have them in hand for processing.

Yours truly,
Ivison Blakeman & Co
